REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art, either alone or in combination, does not disclose or render obvious an optical transceiver for insertion into a mounting cage, of the type including at least one spring finger extending into engagement with at least one abutment surface on the optical transceiver, including: at least one optical sub-assembly for converting an optical signal into an electrical signal or for converting an electrical signal into an optical signal; a housing for supporting each optical sub-assembly; at least one optical connector port for receiving an optical fiber; an electrical connector for transmitting electrical signals to and from each optical sub-assembly; a sliding member reciprocatable on said housing between a latched and an unlatched position; at least one camming member extending from said sliding member; a bail handle pivotally mounted on said housing and engaged with said sliding member; whereby rotation of said bail handle reciprocates said sliding member causing said camming member to disengage each spring finger from each abutment surface enabling the optical transceiver to be removed from the mounting cage in combination with the rest of claim 1.

It is noted that the claim 1 is allowable because the unique combination of each and every specific element stated in the claim.

The prior art, either alone or in combination, does not disclose or render obvious an unlatching mechanism for an opto-electronic device, of the type which is mountable in a cage attached to a circuit board in a host device, the cage having at least one spring finger for extending into contact with an abutment surface on a housing of the

opto-electronic device, the unlatching mechanism including: a sliding member reciprocatable on the housing between a latched and an unlatched position; at least one camming member extending from said sliding member; a bail handle pivotally mounted on the housing and engaged with said sliding member; whereby rotation of said bail handle reciprocates said sliding member causing said camming member to disengage each spring finger from each abutment surface enabling the opto-electronic device to be removed from the cage in combination with the rest of claim 15.

It is noted that the claim 15 is allowable because the unique combination of each and every specific element stated in the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
